Dr. Erik Skovbjerg Rasmussen

Geological Survey of Denmark and Greenland (GEUS), Denmark

PRVO PREDAVANJE:

The Geology of Denmark

DRUGO PREDAVANJE:

Application of sequence stratigraphy in the search of aquifers in siliciclastic deposits

Dr. Erik Skovbjerg Rasmussen is research geologist at Geological Survey of Denmark and Greenland (GEUS) with over 30 years of experience in regional and field mapping by using seismic, well data (including detailed description of cores) and field sedimentology. Through GeoTwin project he will provide training in integrated interpretation of geophysical and geological data for HGI-CGS scientists involved in Work Package 1.
